SUMMARY

Current developer with a background in coaching rowing teams. Meticulous planner and problem-solver. Passion for positive team environments, taking on small tasks that add to large outcomes, and being challenged.

PRIMARY EXPERIENCE

Web Developer in Training

September – December 2018

General Assembly

- Trained in a variety of modern programming languages and technologies during a 12-week, 600-hour course.
- Covered front- and back-end programming fundamentals.
- Created full-stack applications individually and as part of a team.
- Built RESTful APIs and integrated data from third party APIs.
- Utilized Git/GitHub for version control.

Featured Project: Browser-based inventory management system

- SPA built with React on the front-end and a Rails API on the back-end.
- Client utilizes user to CRUD on a Collection resource they own.
- Scraped third-party data collection to seed postgresSQL database with Rails.
- Stack: Rails, postgresSQL, React, Bootstrap via react-strap.

Featured Project: Team Project

- Built an SPA that allows users to create and take surveys.
- Practiced pair programming in order to meet stretch goals.
- Managed version control with advanced Git / Github.
- Stack: Express, MongoDB, jQuery, Handlebars, Bootstrap.

Rowing Coach

August 2011

The George Washington University

– June 2017

- Managed a team of 45 student-athletes throughout academic year.
- Achieved team's best results in program history in final year with the team.
- Organized plans for recruiting, training, building positive team culture, resource management in order to produce better race results.

Rowing Coach and Recruiting Coordinator

August 2008

Bates College

– June 2011

- Managed a team of 60 student-athletes throughout academic year.
- Worked closely with admissions office to recruit at a highly selective college.
- Further involved in campus community as campus safety officer and basketball commentator.

Associate Analyst

January

Social Science Automation, Inc

– August 2008

- Built a text-based program in Microsoft Access that tagged individual news articles among a mass volume of articles to specific locations based on grammatical patterns.
- Systematically collected and organized a data collection of thousands of articles covering 26 countries and a span of ten years for use in testing.
